

Dear Parents,

Greetings!

We are pleased to inform you that as part of our Term 1 enrichment activities, **students of Grades 7 and 8 will work on a sustainability-themed project** during their term break.

The project can be completed individually or in groups of up to 3 students. Each student or group will present their working model at an exhibition on **Thursday, 24th October**, and will also give a verbal explanation. The project is graded out of 10 marks.

Students must present their models to their Science teachers on **Tuesday, 22nd October** for evaluation and final preparations. Kindly refer to the provided rubrics to guide your child in the right direction.

**Rubric for Sustainability-Themed Project:**

Criteria	Description	Marks
Creativity and Innovation	Originality and uniqueness of the model. Does the project demonstrate creative thinking and problem-solving?	2
Scientific Accuracy	Relevance to sustainability and the accurate application of scientific concepts and principles.	2
Functionality of the Model	Does the model work or demonstrate the concept effectively? Is it practical and operational?	2
<b>Verbal Presentation</b>	Clarity of explanation, confidence in delivery, and ability to answer questions about the model.	2
Aesthetic and Design	Neatness, visual appeal, and effort put into the overall presentation of the model.	1
Effort and Time Management	Demonstrates consistent effort, completion on time, and attention to detail throughout the project.	1

Your support in ensuring the timely completion of the project is greatly appreciated.

Thank you for your cooperation.

Best regards,

EIS Administration
